Subject index to The Milk Industry, 1978

This index covers the editorial contents of volume 80 published between January and December 1978, inclusive. For ease of reference, subjects are generally listed under the key word in the title (ie, Bottling: the future for aseptic. UHT milk: British samples in Moscow) but where deemed necessary, cross references are given. The entries under "Milk" and "Dairy" have been kept to a minimum.

SECTION 1

Acidophilus milk manufacture: new

methods of	January	
Agriculture: a research policy for	November	Edewecht; the world's most auto-
Associated Dairies: opening of New-		mated cheese plant?
